

Astrology, Star Alignments and the Mayan Calendar of 2010 & 2011

The Astrology of 2010 and the New Moon of June 12, 2010

2010 begins the crucial time of dynamic change. It is also heralding the call to the creation of a new enlightened reality.

The New Moon June 12, 2010 cycle, is the time for us to plant “organic” seeds that will blossom and flower into the living expression of our beautiful new Earth; A Return to Love and a Golden Age of Aquarius.

On March 10, 2010 a stellar explosion happened. That same day Mars, the planet of energy, action, power and initiation began to move direct (forward) after being in a retrograde (backward) motion since early December 2009. Mars was retrograding, a review time in the sign of Leo, reminding us to reclaim our rights, our light and our power.

The huge stellar explosion in the heavens took place in the constellation of Cygnus, the Swan, also known as the Northern Cross and close to its main star Deneb, who leads us home on the Milky Way path to our true star origin. Andrew Collins in his ground breaking book “The Cygnus Mystery” states: “All around the world ancient peoples fixed the location of the heavens - the source of cosmic life and death in this segment of the sky - the constellation, Cygnus.”

In February 2009, there were 6 planets together in Aquarius. This is known as a stellium in astrology for it creates potent planetary group energy in one sign. Many of you may have gotten e-mails in February 2009 saying this is the astrological time of “The dawning of the Age of Aquarius” sung about in the 60’s. This was because of the location of all these planets in the sign of Aquarius. This is also where the 2010 stellar explosion happened and is yet another sign of the great “Shift of Ages”.

This stellar explosion opened the Aquarian portal. Now the Aquarian water-bearer is pouring the light of the heavens to Earth and showering us with the cosmic ray particles that drive evolution. As another 60’s song reminds us: “We are stardust, we are golden and we have got to get back to the garden.”

Chiron and Neptune continue to remain together in a close conjunction in this sacred location in the heavens throughout 2010, 2011 and into the important year 2012.

Chiron brings to the surface the deepest wounds in our collective consciousness, while Neptune through the angelic and spiritual realms, can dissolve and transmute these wounds.

We are healing the global and personal wounds now. We are healing from the illusion of being alone and separate from Spirit. We are healing from the terrible genocide that has been inflicted on humanity and nature throughout the ages.

We can let whatever wound we have suffered come up, and can now let it go. Feel it cleared, cleansed and healed: the pain and suffering transmuted in the light of the violet flame. We can claim and express our divine birthright, as free multidimensional spiritual beings.

On this New Moon, the Sun and Moon merge in the sign of the twins of love and wisdom, Gemini, ruled by the winged messenger Mercury. They are aligning to the star in the constellation of Orion - Bellatrix, the female warrior, the Amazon queen star.

Bellatrix brings through a clear light to empower the divine feminine within men and women. She is saying, "Remember that you were all given birth through the feminine on this planet. We are being reborn once again through the divine feminine, mother of all living, Gaia, the Goddess who wishes to bring forth new life, to make sure her children are safe, fed, nourished and grow in an abundant, loving, beautiful, peaceful and healthy world."

The nodes of the moon tell us the story of this new moon cycle. The south node points to where we have been and where we have learned in the past. The north node is in the opposite sign and points us in a new direction, where we are to manifest our destiny.

The south node is in the sign of Cancer, the moon, home, mother, family, tribe and is aligned to the brightest star in our sky, Sirius. Sirius is one of the stars closest to our Sun and they travel together in the heavens. Sirius has always been a navigational star and guide on our path to ascension. It is home to many ascended masters and the birthplace of the dolphins and whales, those magnificent super-conscious beings. The south node in this position is saying to know where you all come from that our Sirian and other star ancestors are with us, watching over us and assisting us during this time of our rebirth.

The north node is in the sign of Capricorn, the father, the form and structure, who wishes to build strong, solid foundations to support life for the family, the mother, the tribe. The north node is aligned to the beautiful star, Vega in the constellation of Lyra the harp. You may remember this was the star that was pulsating and communicating in the movie "Contact" with Jodie Foster. Vega is known as "The Messenger of Light" who through Lyra the harp played by the angels brings the new sacred frequency through from celestial music of the spheres. This can soothe and inspire us, and in the sacred place of the heart, we are able to open the lotus petals of our spiritual remembering. This enables us to receive clear inner guidance, direction on our path and Return to Love.

At this lunar cycle we receive assistance from formless and mystical Neptune, the planet of the muse, artist, musician, dreamer, poet and dancer who expresses divine love and beauty. Neptune is in a trine aspect. This supports these new moon energies. This is inspiring us to express our creative spiritual natures and to dream the new dream.

As the great healer and spiritual teacher of mind, body, spirit, Deepak Chopra so beautifully stated: "Our bodies and cells contain within them, holographically, all the information that is present in the entire universe."

As we create in the full knowledge of our infinite and multidimensional potential; the awareness that every one of us is a part of this exquisite symphony of the unified cosmic consciousness takes center stage. We are this love and are here to spread this revelation; with the angels, guides, ancestors and masters of love and light working with us, and through us, together in co-creation. This will be amplified in the coming months.

Saturn - the planet of form, time, structure and foundation is in a square aspect to the June 12th new moon. This square requires that we delve deeply within in order to move out of the old ways of the mind and into a new way of thinking, acting and sharing from our hearts. It takes discipline, and we must take the necessary amount of time to receive clarity in how to proceed in creating a healthy and holistic world.

Saturn has been in Virgo, the earth sign of the sacred Virgin Goddess for two and a half year. During the last couple of years more awareness of our ecological and health needs are at the forefront of the global community. Saturn moved into the air sign of balance, love and partnership, the scales of Libra in October 2009.

Saturn will retrograde returning back into Virgo from April 8 until July 22, 2010. July 22nd happens to be Magdalene's feast day and the day of the sacred union of the Sun and Moon, when the sun is on the cusp of Cancer-Moon and Leo-Sun. As Saturn returns to Virgo this will give us time to review and analyze, where we have been and what has been done that was not in alignment with nature, and how we can restore the sacred ways and the Return of Love.

When Saturn moves again into the sign ruled by Venus, Libra, on July 22, 2010 until October 2012, the scales must be in balance. Saturn is exalted in Libra where we are asked to create beauty and balance in all our partnerships with love, integrity, equality, justice, truth and in harmony with all our relations.

This new moon brings the "Big Shift", as the planets, Jupiter and Uranus, both enter the first sign of the zodiac, Aries the ram, who goes headfirst with a pioneering spirit and passionate creative life force, ready to initiate action. Uranus and Jupiter will be at the most potent zero degree of Aries. This is the creation point, degree of the spring equinox, when the new shoots spring forth eager to grow.

Uranus is the great awakener is radical, revolutionary and brings enlightening change. Jupiter, who is larger than all the planets combined, brings expansion, freedom, wisdom, good fortune and knowledge enabling us to see the greater horizon, the "bigger picture", from a vast spiritual perspective.

Together they magnetize, exaggerate and electrify. At this zero degree - the zero point, beyond mind and thought, we can connect to the pure transcendental state of being, the source of all that is. We have the ability to achieve enlightenment and receive revolutionary and evolutionary insights and inspirations. This brings in historic changes and breakthroughs that will impact the whole world. This will lead us forward in bringing about necessary and positive change.

The Uranus-Jupiter conjunction demands progress and propels the start of this critical turning point in our lives. We need to keep centered, so we are able to maintain the clarity we need. With positive focus and intentions much can be accomplished. This planetary combination brings with it strong and powerful energy surges, which need to be used wisely, otherwise it could be a really wild and chaotic ride.

Revolutionary Uranus is in opposition to the rigid form of Saturn. The old and worn out, rigid structures that do not support humanity and were not built on solid foundations, such as the world banks and other world government institutions, corporate systems and organizations are now being shattered. Saturn (form) is also opposite Jupiter (freedom). These Saturn oppositions will force the world and people to view their limited belief patterns and force a review of the "old versus the new", making way for new systems based on altruistic ideals.

When volcanic and transformative Pluto enters, it creates a t-square pattern to Saturn (form) opposing Uranus (change). This aspect is closest at the end of July and August, 2010. Then the intensity builds and ignites and needs a quick resolve, forcing the release this dynamic energy created and propels the rebirth to take place.

We have all witnessed the devastating changes our Earth is going through, rocking and rolling. We, her children and many throughout the world have been devastated by these earth changes. She is going through a necessary shift, shaking off the pollution, stress and negativity. She is asking us to "wake up", to listen and change as well. We can assist in this shift and make it easier for us all. The energy fields of humanity and Earth are intimately connected. What is thought, done and felt by humanity contributes to what happens on earth. By listening, opening and connecting our heart to her heart, by using our gift of intuition, and being at peace we serve the greater whole. The old systems that are not in alignment with love must crumble. This is in divine order and will bring the new global educational, ecological and sustainable systems that are needed.

Message from the Mayan Elders

I wish to share what Don Alejandro Cirilo Perez, the Mayan elder and President of the Mayan Council of Guatemala, had to say about the ending of the Mayan calendar. He shared this following 10 days of the most beautiful ceremonies performed with indigenous elders from North and South America and from traditions from around the world coming together at "The Gathering of the Ancestors" in April, 2009 in Sedona, Arizona. He said he

believes that the earth will go through a period of darkness. When and for how long he does not know. He wanted everyone to know that this is part of a natural cycle and not to be feared. He wanted us to know that we have gone through this before. The most important thing for everyone to do is to connect their hearts with the heart of our Earth Mother and the heart of the heavens, our Sky Father. When we do this, we are held safe in the womb of our Earth Mother to be reborn in the new time. Before birth we all grew in the dark womb of our own mother and connected to her heartbeat. We all have done this and know how to do this: it is natural. This is what we must do again during this shift in a conscious way.

Don Alejandro asked enlightened spiritual teacher and author, Drunvelo Melchizedek to be the spokesperson for the Mayan people. You can hear their message on u-tube: Drunvelo Melchizedek - The Maya of Eternal Time - July 29, 2009.

Drunvelo sent out an important announcement saying; “The Unity Consciousness Grid” has finally come to birth since February 2008. The birth of this new living grid is certain, and I believe, the most important story since Atlantis, and yet hardly anyone on Earth is aware it has happened or what it means for humanity.

One thing is clear: the outcome of the global consciousness transition is going to affect every single last person on the planet. If you know what has now become history, your heart can rest knowing that what is to follow in our lives is one of the greatest gifts that Source has given to mankind.”

2011 - Creation Speeds Up

The “Galactic Cycle” of the Mayan calendar was said to have begun in January, 1999. On February 10, 2011 we come into what is being called the “Universal Consciousness Cycle”. In this cycle we become conscious co-creators. Ian Xel Lungold shared how it is not time that is speeding up, but creation that is speeding up. He shares that in this Universal consciousness cycle what took us 360 days to create, will take only 20 days. This will lead us into the prophesized date of 2012.

Ian Xel Lungold- researcher, author and teacher of the Mayan Calendar, shared this information before he passed on to his galactic station in 2005 to assist us. He was a descendant of Johnnie Apple seed and like his ancestor, planted many seeds. His teachings can be viewed on u-tube; by going to: Ian Xel Lungold - The Evolution Continues.

We are the Birth of the New Earth & New Humanity

On July 1, 2011 the most exciting and important cosmic astronomical, astrological and global event will take place, which we will take part in as co-creators: The birth of a New Solar Eclipse Cycle!

This is a creation of our entire collective unity consciousness. The importance of sharing this right now is to bring awareness to the fact that we are all co-creating this birth right now. Each of us is pregnant with infinite possibilities.

The 2011 Mayan calendar date coincides with the beginning of a new solar eclipse cycle. This is a quite rare occurrence, and last happened in 1928.

Eclipse cycles begin and create a story line, a theme of based on the collective consciousness that is happening on earth at the time they begin. They last for 1200-1300 years. Every 18 years this solar eclipse cycle, this consciousness, will be visible again to further the theme or story of the new creation.

This means that every living thing on the planet, and what is in the collective unity consciousness is responsible for parenting the new consciousness, the “new child” that will be given birth at 7:53 GMT on July 1st, 2011 in the South Pole. This consciousness, this “love child” will live for 1226.05 years until the year 3237.

On July 1, 2011, which will be the date for the next 2011 Bee Here Now ceremony, let us come together and celebrate the birth of a healthy and beautiful new “love child” (unity consciousness), a new paradigm, and our ascension in to The Golden Age of Aquarius.

Venus - the Honeybees & the Return to Love

Rudolf Steiner, the brilliant Austrian visionary, esoteric philosopher and educator spoke about the significance of the Bee. He did a series of nine lectures before his passing in 1925, about the bees and how they are from Venus. He said if we did not stop the manipulation of the honeybees then, we would be in the position we are finding that we are in now with their decline.

In 1908 Rudolf Steiner in his lecture said; “The consciousness of a Beehive, not the individual Bees, is of a very high nature. Humankind will not obtain the wisdom of such consciousness until the major revolutionary stage - that of Venus -which will come when the evolution of earth stage is finished. The human beings will possess the consciousness necessary to construct things with a material they create themselves.”

We are at this Ascension time right now!

May we once again hear the joyous hum of our bee loved honeybees happily flying from flower to flower, creating beauty and honey. May all hear the sacred Om -Aum of the infinite universe. Let us all drink the sacred nectar - “Amrita” from the chalice of the Holy Grail and ...

Return to Love, Beauty, Peace
Heaven on Earth

Om Shanti Om
